

I am writing in regards to K-LOVE, which airs on 89.7 in my area. This radio station has quality programming that I can listen to with my daughter in the car and never have to change it. So many stations have such perverse commercials that I have to turn it down. This station provides me with local and national events and news. It also provides contacts for people who are in need of emotional or physical help, such as their 800 number or other non-profit agencies. If this radio station is taken off the air, there will be many people who are deprived of the encouragement they provide. Personally, my daughter would be crushed. She loves the songs as much as I do. It is very relaxing to drive to in the morning commute. Please keep this station on in my area. Thank you.
